The second year IB Visual Arts students cordially invite you to the final presentation of their artworks

Over a period of two years, students realized artworks in various artistic mediums such as drawing, painting, print, collage, sculpture, photography and film. Themes were explored and ways found to visually communicate ideas. Emphasis was placed on the artmaking process, whereas the development of studio work was continually informed by contextual investigation.

Enjoy an evening of art with music and buffet. Take the opportunity to discuss work with students and share in their experience.
